

# **SMART CONTRACT SECURITY AUDIT**

Final report Plan: Simple

## AdultClubCam.com

July 2022

rugdog.net

■ the@rugdog.net

### **♦** CONTENTS

1. Introduction	3
2. Contracts checked	3
3. Audit Process	3
4. Attacks checked	4
5. Classification of issues	5
6. Issues	6
6.1 High severity issues	6
6.2 Medium severity issues	6
6.3 Low severity issues	6
7. Conclusion	7
8. Disclaimer	8
9 Static Analysis	9

July 2022 Page 2 of 13

Final report

#### **♦** INTRODUCTION

A fungible token of ERC20 standard with antibot functionality.

Name AdultClubCam.com

Audit date 2022-07-07 - 2022-07-07

Language Solidity

Network Binance Smart Chain

#### **♦ CONTRACTS CHECKED**

Name Address

AntiBotStandardToken 0xb9c1a98ffba4f70c7d05738cc230e80b5d64a2cc

#### **AUDIT PROCESS**

The code was audited by the team according to the following order:

Automated analysis

- Scanning the project's smart contracts with several publicly available automated Solidity analysis tools
- Manual confirmation of all the issues found by the tools

Manual audit

- Thorough manual analysis of smart contracts for security vulnerabilities
- Smart contracts' logic check

July 2022 Page 3 of 13

### **ATTACKS CHECKED**

Title	Check result
Unencrypted Private Data On-Chain	✓ passed
Code With No Effects	✓ passed
Message call with hardcoded gas amount	✓ passed
Typographical Error	✓ passed
DoS With Block Gas Limit	✓ passed
Presence of unused variables	✓ passed
Incorrect Inheritance Order	✓ passed
Requirement Violation	✓ passed
Weak Sources of Randomness from Chain Attributes	✓ passed
Shadowing State Variables	✓ passed
Incorrect Constructor Name	✓ passed
Block values as a proxy for time	✓ passed
Authorization through tx.origin	✓ passed
DoS with Failed Call	✓ passed
Delegatecall to Untrusted Callee	✓ passed

July 2022

Use of Deprecated Solidity Functions	✓ passed
Assert Violation	✓ passed
State Variable Default Visibility	✓ passed
Reentrancy	✓ passed
Unprotected SELFDESTRUCT Instruction	✓ passed
Unprotected Ether Withdrawal	✓ passed
Unchecked Call Return Value	✓ passed
Floating Pragma	✓ passed
Outdated Compiler Version	✓ passed
Integer Overflow and Underflow	✓ passed
Function Default Visibility	✓ passed

#### **♦ CLASSIFICATION OF ISSUES**

**High severity** Issues leading to assets theft, locking or any other loss of assets or

leading to contract malfunctioning.

**Medium severity** Issues that can trigger a contract failure of malfunctioning.

**Low severity** Issues that do now affect contract functionality. For example,

unoptimised gas usage, outdated or unused code, code

styleviolations, etc.

**High severity issues** 

No issues were found

**Medium severity issues** 

No issues were found

Low severity issues

#### 1. Antibot may block transfers (AntiBotStandardToken)

The contract calls an external contract for antibot protection. The antibot contract is deployed via proxy and it's coe can be changed. The antibot may potentially block transfers.

```
function _transfer(
    address sender,
    address recipient,
    uint256 amount
) internal virtual {
    ...

    if (enableAntiBot) {
        pinkAntiBot.onPreTransferCheck(sender, recipient, amount);
    }
    ...
}
```

July 2022 Page 6 of 13

AdultClubCam.com AntiBotStandardToken contract was audited. 1 low severity issue was found.

July 2022 Page 7 of 13

#### **♦ DISCLAIMER**

This report is subject to the terms and conditions (including without limitation, description of services, confidentiality, disclaimer and limitation of liability)set forth in the Services Agreement, or the scope of services, and terms and conditions provided to the Company in connection with the Agreement. This report provided in connection with the Services set forth in the Agreement shall be used by the Company only to the extent permitted under the terms and conditions set forth in the Agreement. This report may not be transmitted, disclosed, referred to or relied upon by any person for any purposes without RugDog prior written consent.

This report is not, nor should be considered, an "endorsement" or "disapproval" of any particular project or team. This report is not, nor should be considered, an indication of the economics or value of any "product" or "asset" created by any team or project that contracts RugDog to perform a security assessment. This report does not provide any warranty or guarantee regarding the absolute bug-free nature of the technology analyzed, nor do they provide any indication of the technologies proprietors, business, business model or legal compliance.

This report should not be used in any way to make decisions around investment or involvement with any particular project. This report in no way provides investment advice, nor should be leveraged as investment advice of any sort. This report represents an extensive assessing process intending to help our customers increase the quality of their code while reducing the high level of risk presented by cryptographic tokens and blockchain technology.
